

Create a complete, modern, responsive UI for a productivity web app called \*\*DevTrack\*\*.

Use React + Tailwind CSS v4. The UI should look sleek, minimalistic, and professional.

### ### BRANDING:

- Primary color: #4F46E5 (indigo)
- Secondary: #0A0A0A (dark)
- Accent: #6366F1 (lighter indigo)
- Text color: white on dark backgrounds, dark gray on light backgrounds
- Typography: bold, modern, wide spacing, using Inter or Poppins

### ### LAYOUT REQUIREMENTS:

#### 1. Build a reusable layout component with:

- Centered content container
- Sticky header
- Clean spacing
- Maximum width: 1200px

#### 2. Create pages:

- Landing Page (Hero section)
- Login Page
- Register Page
- Dashboard Page (placeholder UI)
- Sidebar Navigation component
- Button components
- Input components

---

## ## **1** LANDING PAGE (HERO)

Build a beautiful hero section:

Heading: \*\*DEVTRACK\*\*

- Bold, huge typography
- White text
- Centered

Subtext:

“Turn your goals into a trackable journey.”

Add a CTA button:

- “Start Your Journey”
- Indigo background (#4F46E5)
- Rounded-xl
- Hover effect: slight lighten

Background:

- Solid #0A0A0A
- Center the entire section (vertical + horizontal)
- Full height (min-h-screen)

---

## ## **2** LOGIN PAGE

Design a clean form UI:

- Card-style container (dark gray #111)

- Inputs for email + password
- Submit button with full width
- “Don’t have an account? Register” link
- Center the form (flex items-center justify-center)
- Add subtle shadows and rounded corners

---

## ## **3** REGISTER PAGE

Same as login but with:

- Name input
- Email input
- Password input
- Confirm password

---

## ## **4** DASHBOARD UI

Create a modern logged-in dashboard:

Sections:

- Sidebar (vertical)
- Topbar (horizontal)
- Main content area (placeholder like “Your Goals Will Appear Here”)

Sidebar items:

- Home
- My Goals

- Tasks
- Progress
- Settings
- Logout

Sidebar styling:

- Background: #0A0A0A
- Active item highlighted with #4F46E5
- Icons optional (lucide-react)

Main area:

- Light background #F8FAFC
- Headings dark gray
- Cards with rounded-lg and shadows

---

## ## **5** COMPONENTS

Build reusable UI components:

### Buttons:

- Variants: primary, secondary, ghost
- Add hover animations

### Inputs:

- Rounded-lg
- Border #4F46E5 focus states

### ### Card Component

---

## ## **6** GLOBAL STYLING

Add:

- Smooth animations
- Transition on hover
- Wide letter spacing for DEVTRACK branding
- Dark/light contrast

---

## ## **7** OUTPUT FORMAT

Generate:

- JSX components
- Tailwind classes
- Proper folder structure:

src/

  components/

  pages/

  layout/

  hooks/

  App.jsx

  main.jsx

---

### GOAL:

A clean, modern, beautiful UI skeleton for DevTrack that I can plug authentication and backend logic into later.

Start coding now.
